**100% NATURAL**  
**100% QUALITY**  
**100% PURE ENJOYMENT**

---

Smoozy Suzy is the perfect smoothie-enjoyment. A multi-ingredients-puree of whole fruits, vegetables and superfoods. This is already mixed, separately portioned, deep-frozen and non-perishable up to one year.

The special aspect of Smoozy Suzy: Due to

shock-freezing the fruits vitamins and nutritive substances are preserved. No added sugar or artificial vitamins & aroma. Smoozy Suzy doesn't need ice cubes, neither juices nor yogurt, it is only mixed up with 125ml water. That's why SMOOZY SUZY tastes to a 100% as the particular variety.

## FRESHLY MIXED – THE IDEA ABOUT SMOOZY SUZY

---

Cutting fruits, choosing vegetables, adding ice cubes, putting everything into the mixer, mixing it, waiting, mixing it again – all these steps gastronomes have to take if they want to create a „real“ smoothie. That takes time. Time that the stuff doesn't have.

What's more - the amount of fruits and vegetables is hard to calculate, that's why in many cases leftovers have to be thrown away.

In addition fruits and vegetables often loose, due to wrong storage, vitamins and valuable nutrients. That's what we wanted to change!

Out of this the idea about Smoozy Suzy was created. Ready packaged, separately portioned, deep-frozen and mixed in 30 seconds. Tear open the package, add 125 ml water and this is it.

Ideal, right? That's what we also thought.

Smoozy Suzy – tastes delicious and is rich in vitamins and nutritive substances.

Mixed with water SMOOZY SUZY is, referred to by the German Agency for Nutrition, a „good“ smoothie. That means: According to the German Agency for Nutrition a „good“ smoothie should

contain at least 50% „whole“ fruits or vegetables as piece components or puree of whole fruits or vegetables. No added sugar, no additives and no addition of insulated nutrients are found in SMOOZY SUZY and they aren't concentrated by water abstraction.

---

## BETTER DEEP-FROZEN

---

Fruits, that are kept by room temperature can loose up to 50% of their valuable nutrients. Furthermore imported fruits are often harvested too early and that's why they don't contain as many nutrients as ripe fruits. That's why we use deep-frozen fruits and vegetables. While shock-freezing, the cellular fluid builds only little

ice crystals because of of the quick process. Therefore the cell structure and also the nutrients are mostly preserved.

Even after several months the vitamin- and nutrient content of SMOOZY SUZY is much higher than in fruits, that are only stored for a few days at room temperature.
